

PROJECT VISION STATEMENT

Meredith's village and rural settings will be enhanced by the US 3 /NH 25 corridor, which will allow easy access to village destinations while moving traffic through in a slow, steady, safe and efficient manner.

Peak congestion in Meredith and the Region will be mitigated by managing pedestrian flow, educating the public about alternate traffic routes and providing for various modes of transportation. People will feel comfortable walking or cycling on the corridor which will promote the town's social life, recreational offerings, historic features, and economic vitality. Long term viability of the corridor and stewardship of the natural environment and cultural assets will remain a steadfast priority.
